

MinnCoDA Fellowship

COMMUNICATION
GUIDE

WE'RE ON THE
BAND APP!

Hi all,

We're excited to announce that this year our local fellowship in Minnesota will be using BAND to communicate. Sharing information with large groups of people is challenging and this tool will help us all stay on the same page without email or texting headaches. We can communicate about events, plan together and ensure information is widely accessible to our membership.

What is BAND?

BAND is a free group communication app that helps organize groups. We can communicate privately and share content all in one place. Band can be used on your phone or desktop computer.

Your Responsibility

BAND is an interactive space. Leave comments and ask questions. Voice your opinion through Polls. RSVP to events. Sign up for service opportunities. Download flyers and other helpful tools in Files. Chat with other members.

We ask that you **turn on the app notifications** so that you can stay informed and respond on time. You can modify the notifications in settings and even set a "do not disturb" time.

How We'll Use It

We'll share information related to MinnCoDA. That includes announcements, events, last minute changes, files, resources and so on. All fellowship information will be at your fingertips. Not sure about something? Check the Band first.

Let's Get Started!

Copy the link below into your browser, or use your QR Reader to download the app, and sign up. Once signed in, you'll be directed to our group Band.
